

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [0029] with the following amended paragraph.

[0029] Common forms of computer-readable media include, for example, a floppy disk, a flexible disk, hard disk, magnetic tape, or any other magnetic medium, a CD-ROM, any other optical medium, punch cards, paper tape, any other physical medium with patterns of holes, a RAM, a PROM, and EPROM, a FLASH-EPROM, any other memory chip or cartridge, ~~a carrier wave as described hereinafter,~~ or any other medium from which a computer can read.

Please replace paragraph [0032] with the following amended paragraph.

[0032] The network link 220 typically provides data communication through one or more networks to other data devices. For example, the network link 220 may provide a connection through the local network 222 to a host computer 224 or to data equipment operated by an Internet Service Provider (“ISP”) 226. The ISP 226 in turn provides data communication services through the worldwide packet data communication network now commonly referred to as the “Internet” 228. The local network 222 and the Internet 228 both use electrical, electromagnetic or optical signals that carry digital data streams. The signals through the various networks and the signals on the network link 220 and through communication the interface 218, ~~which~~ carry the digital data to and from the computer system 200, ~~are example forms of carrier waves transporting the information.~~

Please replace paragraph [0034] with the following amended paragraph.

[0034] The received code may be executed by processor 204 as it is received, and/or stored in storage device 210, or other non-volatile storage for later execution. In this manner, the computer system 200 may obtain application code ~~in the form of a carrier wave~~.

2.1.3 EXAMPLE NETWORK MANAGEMENT SYSTEM THAT
 MANAGES MULTIPLE SOFTWARE COMPONENT VERSIONS
